Changeable Type and key cap customizes your Smith-Corona typewriter in seconds!

Who needs changeable type?

Everyone who types!

Now, Smith-Corona takes the "drawing" out of typing! Forget about inking in accents or special characters. Stop sketching in engineering or medical symbols. You can type them all with Smith-Corona Changeable Type™—through as many carbons as you need. Precision-cut characters give you a neat . . . fast . . . professional looking job every time—without disturbing your standard keyboard.

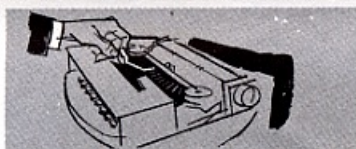

ONLY \$10.00 PER SET OF TYPE

Here's how easy it is to use Smith-Corona Changeable Type!

Changeable Type customizes your portable instantly. Here's all there is to it. (On electrics, be sure power is OFF.)

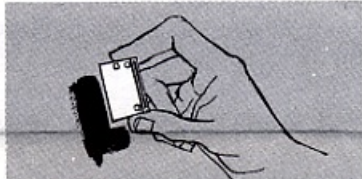

1. Pull cover forward so that type is uncovered.

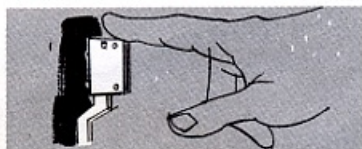

2. Gently lift the #1 type bar until you can feel it resist lifting higher.

3. Holding the type bar firmly, raise the type unit gently, pressing forward. When you feel the lock release, lift the type off.

4. Pick up the new type unit with type facing away from you toward the carriage, top up. (The top of each type unit has a small lock bar in the center, the bottom is open.)

5. Slip the type into position, pressing gently down and toward you at the top, away from you at the bottom. Press gently, do not force, you will feel it snap-lock in position.

6. Lift the #1 key-cap up and off and press on the proper one.

Changeable Type need not be removed unless another character is desired.
